Earliest Ships: The Evolution of Boats Into Ships (Conway's History of the Ship)

Earliest Ships: The Evolution of Boats Into Ships (Conway's History of the Ship)

Researching back into prehistory and into the earliest evidence provided by archaeology, this volume explores the varied lines of development from the most primitive watercraft to the first real seagoing ships, from Northern Europe, through the Mediterranean to the Near and Far East. It traces the most primitive forms of boats - rafts, skin boats and dugouts, for example - which developed ultimately into ships for trade, commerce and war. Apart from chapters on the craft themselves there are sections on related topics, including early pilotage and seamanship, and an evaluation of what modern reconstructions can tell us about the performance of ancient ship types. The Earliest Ships not only summarises existing information but has been produced by many of those whose pioneering work was responsible for the revolution in understanding in the first place.
