Patient-Controlled Analgesia F.Michael Ferrante, Benjamin G. Covino

This is a definitive review of patient-controlled analgesia. Divided into four parts the opening chapters are an introduction to PCA and include a historical perspective, the pharmacology of patient administered opioids and patient selection. The clinical section covers the use of PCA in paediatric, obstetric and oncologic pain, plus the methods of administering therapies, and the complaints and complications. The final sections cover the pain management team, logistical and economic issues and future technological and pharmacological developments.
