Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) Karl Stephan

I welcome the opportunity to have my book translated, because of the great emphasis on two-phase flow and heat transfer in the English-speaking world, as related to research, university education, and industrial practice. The 1988 Springer-Verlag edition of "Warmeübergang beim Kondensieren und beim Sieden" has been enlarged to include additional material on falling film evaporation (Chapter 12) and pressure drop in two-phase flow (Chapter 13). Minor errors in the original text have also been corrected. I would like to express my sincere appreciation to Professor Green, Associate Professor of German at Rensselaer, for his excellent translation and cooperation. My thanks go also to Professor Bergles for his close attention to technical and linguistic details. He carefully read the typescript and made many comments and suggestions that helped to improve the manuscript. I hope that the English edition will meet with a favorable reception and contribute to better understanding and to progress in the field of heat transfer in condensation and boiling. February 1992 K. Stephan Preface to the German-Language Edition This book is a continuation of the series "Heat and Mass Transfer" edited by U. Grigull, in which three volumes have already been published. Its aim is to acquaint students and practicing engineers with heat transfer during condensation and boiling, and is intended primarily for students and engineers in mechanical, chemical, electrical, and industrial processing engineering.

From reader reviews:

Johnnie Santiago:

Nowadays reading books are more than want or need but also become a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge your information inside the book which improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want drive more knowledge just go with education books but if you want sense happy read one together with theme for entertaining such as comic or novel. Typically the Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) is kind of e-book which is giving the reader capricious experience.

Candy Dixon:

This book untitled Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) to be one of several books which best seller in this year, this is because when you read this e-book you can get a lot of benefit in it. You will easily to buy this kind of book in the book retail outlet or you can order it via online. The publisher with this book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Cell phone. So there is no reason to you personally to past this book from your list.

Michelle Han:

The actual book Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) will bring you to the new experience of reading the book. The author style to explain the idea is very unique. In case you try to find new book you just read, this book very appropriate to you. The book Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) is much recommended to you to see. You can also get the e-book from your official web site, so you can more readily to read the book.

Jessie Davis:

The publication untitled Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) is the e-book that recommended to you to study. You can see the quality of the book content that will be shown to you actually. The language that writer use to explained their way of doing something is easily to understand. The article writer was did a lot of investigation when write the book, hence the information that they share to your account is absolutely accurate. You also can get the e-book of Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) from the publisher to make you a lot more enjoy free time.
