The Research Interview: Reflective Practice and Reflexivity in Research Processes S. Mann

Research and Qualitative Interviews brings into focus the decisions that the interviewer faces by taking a data-led approach in order to open up choices and decisions in the process of planning for, managing, analysing and representing interviews. The chapters concentrate on the real-time, moment-by-moment nature of interview management and interaction. A key feature of the book is the inclusion of reflexive vignettes that foreground the voices and experience of qualitative researchers (both novices and more expert practitioners). The vignettes demonstrate the importance of reflecting on and learning from interactional experience. In addition, the book provides an overview of different types of interviews, commenting on the orientation and make-up of each type. Overall, this book encourages reflective thinking about the use of research interviews. It distinguishes between reflection, reflective practice and reflexivity. All the chapters focus on recurring choices, dilemmas and puzzles; offering advice in opening out and engaging with these aspects of the research interview.
