The Peters World Atlas: The Earth in Its True Proportion Arno Peters

This atlas corrects our misconceptions of the geography of the planet. Based on the revolutionary Peters Projection, each double-page spread shows one sixtieth of the Earth's surface presenting an astronaut's eye view. The use of colour and relief intensifies the green jungles, the brown deserts and the brown mountains and the 246 thematic maps cover subjects such as: global rainfall, birth control, marriage, weather, the status of women, employment and military strength.
