Green Building: Project Planning and Cost Estimating (RSMMeans) RSMMeans

Since the widely read first edition of this book, green building has gone from a growing trend to a major force in design and construction. The chapters, case studies, resources, and cost data in this book give you the whole picture on green building, including the latest on:

- Green building approaches, materials, systems, and standards
- Energy efficiencies – with energy modeling tools
- Health, comfort, and productivity-goals and techniques
- Evaluating the cost versus value of green products over their life cycle
- Specifying green building projects – complete with a list of often-specified products/materials and a sample spec
- Low-cost green strategies and special economic incentives and funding
- Assembling the green project team and commissioning the building
- Deconstruction: a new chapter on this key element of sustainable building

FEATURES:

This 2nd edition has been completely updated with the latest in green building technologies, design concepts, standards, and costs. It includes RSMMeans' **Green Building Project Planning Cost Data CD-ROM** at no additional cost. The CD contains:

- More than 300 new assemblies (from high-efficiency HVAC and lighting, to living roofs, fuel cells, gray water systems, and much more)
- Over 7,000 unit price line items for green materials and products
- Key word index
- "Virtual notes" to highlight individual lines
- Extensive estimating reference tables
- Localized costs for your geographic area
