The Foundation for the Study of Cycles reports that they have identified over 4000 separate cycles that affect nature, culture, business and productivity. My book examines a few very long-term cycles that influence all of us for decades in subtle and profound ways. When cycles come to completion a period of disorder results. The monetary and political doctrines that railroaded the United States into world affairs, wars and global central banking a century ago are coming to the end of a cyclical line. The public at large can sense the end is coming and a psychological crisis is building. This book explains why it's happening and why happening now. It also spells out some likely future scenarios and ways to prepare to cope.
