Advanced Applications of Natural Language Processing for Performing Information Extraction (SpringerBriefs in Electrical and Computer Engineering) Mário Jorge Ferreira Rodrigues, António Joaquim da Silva Teixeira

This book explains how can be created information extraction (IE) applications that are able to tap the vast amount of relevant information available in natural language sources: Internet pages, official documents such as laws and regulations, books and newspapers, and social web. Readers are introduced to the problem of IE and its current challenges and limitations, supported with examples. The book discusses the need to fill the gap between documents, data, and people, and provides a broad overview of the technology supporting IE. The authors present a generic architecture for developing systems that are able to learn how to extract relevant information from natural language documents, and illustrate how to implement working systems using state-of-the-art and freely available software tools. The book also discusses concrete applications illustrating IE uses.

·   Provides an overview of state-of-the-art technology in information extraction (IE), discussing achievements and limitations for the software developer and providing references for specialized literature in the area

·   Presents a comprehensive list of freely available, high quality software for several subtasks of IE and for several natural languages

·   Describes a generic architecture that can learn how to extract information for a given application domain

From reader reviews:

Clinton Whitten:

Nowadays reading books become more and more than want or need but also get a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want get more knowledge just go with education and learning books but if you want feel happy read one having theme for entertaining like comic or novel. Often the Advanced Applications of Natural Language Processing for Performing Information Extraction (SpringerBriefs in Electrical and Computer Engineering) is kind of reserve which is giving the reader unforeseen experience.

Dana Gallo:

Do you have something that that suits you such as book? The reserve lovers usually prefer to opt for book like comic, limited story and the biggest the first is novel. Now, why not attempting Advanced Applications of Natural Language Processing for Performing Information Extraction (SpringerBriefs in Electrical and Computer Engineering) that give your entertainment preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the means for people to know world far better then how they react towards the world. It can't be claimed constantly that reading habit only for the geeky person but for all of you who wants to end up being success person. So , for all you who want to start reading through as your good habit, you could pick Advanced Applications of Natural Language Processing for Performing Information Extraction (SpringerBriefs in Electrical and Computer Engineering) become your personal starter.

Beverly Hummell:

The book untitled Advanced Applications of Natural Language Processing for Performing Information Extraction (SpringerBriefs in Electrical and Computer Engineering) contain a lot of information on that. The writer explains the girl idea with easy way. The language is very clear to see all the people, so do definitely not worry, you can easy to read the idea. The book was published by famous author. The author brings you in the new era of literary works. You can actually read this book because you can read on your smart phone, or gadget, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can start their official web-site and also order it. Have a nice go through.

Norma Ochoa:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information from your book. Book is written or printed or illustrated from each source this filled update of news. With this modern era like right now, many ways to get information are available for anyone. From media social like newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add

your knowledge by that book. Are you hip to spend your spare time to open your book? Or just seeking the Advanced Applications of Natural Language Processing for Performing Information Extraction (SpringerBriefs in Electrical and Computer Engineering) when you needed it?
