Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science)

Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science)

With the rapid development of information technologies and the transition to next-generation networks, computer systems and in particular embedded systems are becoming more and more mobile and ubiquitous. They also strongly interact with the physical world. Ensuring the security of these complex and resource-constrained systems is a really challenging research topic. Therefore this Workshop in Information Security Theory and Practices was organized to bring together researchers and practitioners in related areas, and to encourage cooperation between the research and the industrial communities. This was the second edition of WISTP, after the first event in Heraklion, Greece, in 2007. This year again we had a significant number of high-quality submissions coming from many different countries. These submissions reflected the major topics of the conference, i. e. , smart devices, convergence, and next-generation networks. Submissions were reviewed by at least three reviewers, in most cases by four, and at least by five for the papers involving Program Committee members. This long and rigorous process could be achieved thanks to the hard work of the Program Committee members and additional reviewers, listed in the following pages. This led to the selection of high-quality papers that made up the workshop program and are published in these proceedings. A number of posters and short papers were also selected for presentation at the conference. The process was very selective and we would like to thank all those authors who submitted contributions that could not be selected.

From reader reviews:

Kevin Santiago:

Your reading 6th sense will not betray a person, why because this Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) e-book written by well-known writer who knows well how to make book that may be understand by anyone who also read the book. Written throughout good manner for you, leaking every ideas and producing skill only for eliminate your own personal hunger then you still skepticism Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) as good book not merely by the cover but also through the content. This is one publication that can break don't judge book by its handle, so do you still needing another sixth sense to pick that!? Oh come on your examining sixth sense already alerted you so why you have to listening to yet another sixth sense.

Alma Young:

This Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) is great e-book for you because the content which can be full of information for you who also always deal with world and still have to make decision every minute. This book reveal it facts accurately using great coordinate word or we can say no rambling sentences inside it. So if you are read it hurriedly you can have whole data in it. Doesn't mean it only provides you with straight forward sentences but difficult core information with beautiful delivering sentences. Having Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) in your hand like getting the world in your arm, information in it is not ridiculous just one. We can say that no reserve that offer you world with ten or fifteen moment right but this book already do that. So , this is certainly good reading book. Hey Mr. and Mrs. occupied do you still doubt that will?

Kurt Hooper:

Is it you who having spare time after that spend it whole day by means of watching television programs or just laying on the bed? Do you need something totally new? This Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) can be the answer, oh how comes? It's a book you know. You are therefore out of date, spending your extra time by reading in this new era is common not a nerd activity. So what these books have than the others?

Fred Prentice:

That e-book can make you to feel relax. This book Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) was vibrant and of course has pictures around. As we know that book Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) has many kinds or style. Start from kids until teenagers. For example Naruto or Investigation company Conan you can read and think you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading in which.
