Model Categories (Mathematical Surveys and Monographs) Mark Hovey

[The book] starts with an account of the definitions, and a development of the homotopy theory of model categories. This is probably the first time in which the important notion of cofibrant generation has appeared in a book, and the consideration of the 2-category of model categories and Quillen adjunctions is another interesting feature. --Bulletin of the London Mathematical Society Model categories are used as a tool for inverting certain maps in a category in a controllable manner. As such, they are useful in diverse areas of mathematics. The list of such areas is continually growing. This book is a comprehensive study of the relationship between a model category and its homotopy category. The author develops the theory of model categories, giving a careful development of the main examples. One highlight of the theory is a proof that the homotopy category of any model category is naturally a closed module over the homotopy category of simplicial sets. Little is required of the reader beyond some category theory and set theory, which makes the book accessible to advanced graduate students. The book begins with the basic theory of model categories and proceeds to a careful exposition of the main examples, using the theory of cofibrantly generated model categories. It then develops the general theory more fully, showing in particular that the homotopy category of any model category is a module over the homotopy category of simplicial sets, in an appropriate sense. This leads to a simplification and generalization of the loop and suspension functors in the homotopy category of a pointed model category. The book concludes with a discussion of the stable case, where the homotopy category is triangulated in a strong sense and has a set of small weak generators.

From reader reviews:

Robert Irizarry:

The book Model Categories (Mathematical Surveys and Monographs) make you feel enjoy for your spare time. You should use to make your capable far more increase. Book can being your best friend when you getting anxiety or having big problem with the subject. If you can make studying a book Model Categories (Mathematical Surveys and Monographs) for being your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about a few or all subjects. You may know everything if you like open up and read a guide Model Categories (Mathematical Surveys and Monographs). Kinds of book are a lot of. It means that, science reserve or encyclopedia or other people. So , how do you think about this e-book?

Harry Greene:

Reading a reserve can be one of a lot of activity that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new information. When you read a guide you will get new information mainly because book is one of various ways to share the information or perhaps their idea. Second, looking at a book will make anyone more imaginative. When you studying a book especially fiction book the author will bring someone to imagine the story how the figures do it anything. Third, you may share your knowledge to others. When you read this Model Categories (Mathematical Surveys and Monographs), you may tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the others, make them reading a guide.

Robert Caldwell:

A lot of people always spent all their free time to vacation or even go to the outside with them loved ones or their friend. Do you know? Many a lot of people spent that they free time just watching TV, as well as playing video games all day long. In order to try to find a new activity this is look different you can read a book. It is really fun for you personally. If you enjoy the book you read you can spent all day every day to reading a e-book. The book Model Categories (Mathematical Surveys and Monographs) it doesn't matter what good to read. There are a lot of folks that recommended this book. These were enjoying reading this book. Should you did not have enough space to deliver this book you can buy often the e-book. You can m0ore quickly to read this book from your smart phone. The price is not too expensive but this book offers high quality.

Raymond Murray:

People live in this new day time of lifestyle always try to and must have the spare time or they will get large amount of stress from both daily life and work. So , if we ask do people have free time, we will say absolutely of course. People is human not really a huge robot. Then we consult again, what kind of activity do you have when the spare time coming to you actually of course your answer will unlimited right. Then

ever try this one, reading ebooks. It can be your alternative inside spending your spare time, the book you have read is usually Model Categories (Mathematical Surveys and Monographs).
