Modular Lie Algebras (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge) George B. Seligman

The study of the structure of Lie algebras over arbitrary fields is now a little more than thirty years old. The first papers, to my know ledge, which undertook this study as an end in itself were those of JACOBSON ("Rational methods in the theory of Lie algebras ") in the Annals, and of LANDHERR ("Uber einfache Liesche Ringe") in the Hamburg Abhandlungen, both in 1935. Over fields of characteristic zero, these thirty years have seen the ideas and results inherited from LIE, KILLING, E. CARTAN and WEYL developed and given new depth, meaning and elegance by many contributors. Much of this work is presented in [47, 64, 128 and 234] of the bibliography. For those who find the rationalization for the study of Lie algebras in their connections with Lie groups, satisfying counterparts to these connections have been found over general non-modular fields, with the substitution of the formal groups of BOCHNER [40] (see also DIEUDONNE [108]), or that of the algebraic linear groups of CHEVALLEY [71], for the usual Lie group. In particular, the relation with algebraic linear groups has stimulated the study of Lie algebras of linear transformations. When one admits to consideration Lie algebras over a base field of positive characteristic (such are the algebras to which the title of this monograph refers), he encounters a new and initially confusing scene.

From reader reviews:

Lawrence Howe:

The book Modular Lie Algebras (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge) can give more knowledge and information about everything you want. Why then must we leave a good thing like a book Modular Lie Algebras (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge)? Several of you have a different opinion about reserve. But one aim in which book can give many facts for us. It is absolutely proper. Right now, try to closer along with your book. Knowledge or details that you take for that, you can give for each other; you are able to share all of these. Book Modular Lie Algebras (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge) has simple shape however you know: it has great and massive function for you. You can look the enormous world by open up and read a e-book. So it is very wonderful.

June Whitaker:

Information is provisions for folks to get better life, information today can get by anyone from everywhere. The information can be a understanding or any news even restricted. What people must be consider if those information which is in the former life are challenging be find than now could be taking seriously which one is suitable to believe or which one often the resource are convinced. If you receive the unstable resource then you get it as your main information there will be huge disadvantage for you. All those possibilities will not happen throughout you if you take Modular Lie Algebras (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge) as your daily resource information.

Paul Frazier:

Spent a free a chance to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their friends. Usually they undertaking activity like watching television, likely to beach, or picnic within the park. They actually doing same every week. Do you feel it? Will you something different to fill your own free time/ holiday? Could possibly be reading a book may be option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to test look for book, may be the reserve untitled Modular Lie Algebras (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge) can be very good book to read. May be it may be best activity to you.

Wayne Martin:

What is your hobby? Have you heard that will question when you got learners? We believe that that question was given by teacher for their students. Many kinds of hobby, Every person has different hobby. So you know that little person like reading or as studying become their hobby. You must know that reading is very important in addition to book as to be the factor. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You discover good news or update concerning something by book. A substantial number of sorts of books that can you go onto be your object. One of them is niagra Modular Lie Algebras (Ergebnisse der Mathematik und ihrer Grenzgebiete. 2. Folge).
