# Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10)

*Barry Simon*

**Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10)** Barry Simon

Barry Simon, I.B.M. Professor of Mathematics and Theoretical Physics at the California Institute of Technology, is the author of several books, including such classics as *Methods of Mathematical Physics* (with M. Reed) and *Functional Integration and Quantum Physics*. This new book, based on courses given at Princeton, Caltech, ETH-Zurich, and other universities, is an introductory textbook on representation theory. According to the author, "Two facets distinguish my approach. First, this book is relatively elementary, and second, while the bulk of the books on the subject is written from the point of view of an algebraist or a geometer, this book is written with an analytical flavor". The exposition in the book centers around the study of representation of certain concrete classes of groups, including permutation groups and compact semisimple Lie groups. It culminates in the complete proof of the Weyl character formula for representations of compact Lie groups and the Frobenius formula for characters of permutation groups. Extremely well tailored both for a one-year course in representation theory and for independent study, this book is an excellent introduction to the subject which, according to the author, is unique in having "so much innate beauty so close to the surface".

### **From reader reviews:**

#### **June Whitaker:**

Reading a publication tends to be new life style in this particular era globalization. With reading you can get a lot of information that may give you benefit in your life. Using book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their particular reader with their story as well as their experience. Not only situation that share in the publications. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors on earth always try to improve their ability in writing, they also doing some investigation before they write for their book. One of them is this Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10).

#### **Andrew Comer:**

Often the book Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10) has a lot associated with on it. So when you make sure to read this book you can get a lot of gain. The book was compiled by the very famous author. The writer makes some research ahead of write this book. This book very easy to read you may get the point easily after reading this book.

#### **Dorothy Alvarez:**

Reading can called mind hangout, why? Because if you are reading a book particularly book entitled Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10) your head will drift away trough every dimension, wandering in each aspect that maybe unidentified for but surely can be your mind friends. Imaging each word written in a publication then become one web form conclusion and explanation that maybe you never get previous to. The Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10) giving you an additional experience more than blown away your thoughts but also giving you useful information for your better life on this era. So now let us explain to you the relaxing pattern here is your body and mind is going to be pleased when you are finished examining it, like winning a. Do you want to try this extraordinary wasting spare time activity?

#### **Helen Chandler:**

Are you kind of busy person, only have 10 or maybe 15 minute in your time to upgrading your mind skill or thinking skill actually analytical thinking? Then you are having problem with the book when compared with can satisfy your small amount of time to read it because all of this time you only find guide that need more time to be study. Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10) can be your answer since it can be read by an individual who have those short free time problems.
