Mathematical Modeling: Applications with GeoGebra

Jonas Hall, Thomas Lingefj?rd

Mathematical Modeling: Applications with GeoGebra Jonas Hall, Thomas Lingefj?rd

A logical problem-based introduction to the use of GeoGebra for mathematical modeling and problem solving within various areas of mathematics

A well-organized guide to mathematical modeling techniques for evaluating and solving problems in the diverse field of mathematics, *Mathematical Modeling: Applications with GeoGebra* presents a unique approach to software applications in GeoGebra and WolframAlpha. The software is well suited for modeling problems in numerous areas of mathematics including algebra, symbolic algebra, dynamic geometry, three-dimensional geometry, and statistics. Featuring detailed information on how GeoGebra can be used as a guide to mathematical modeling, the book provides comprehensive modeling examples that correspond to different levels of mathematical experience, from simple linear relations to differential equations.

Each chapter builds on the previous chapter with practical examples in order to illustrate the mathematical modeling skills necessary for problem solving. Addressing methods for evaluating models including relative error, correlation, square sum of errors, regression, and confidence interval, *Mathematical Modeling: Applications with GeoGebra* also includes:

- Over 400 diagrams and 300 GeoGebra examples with practical approaches to mathematical modeling that help the reader develop a full understanding of the content
- Numerous real-world exercises with solutions to help readers learn mathematical modeling techniques
- A companion website with GeoGebra constructions and screencasts

Mathematical Modeling: Applications with GeoGebra is ideal for upper-undergraduate and graduate-level courses in mathematical modeling, applied mathematics, modeling and simulation, operations research, and optimization. The book is also an excellent reference for undergraduate and high school instructors in mathematics.

From reader reviews:

Max Norris:

Book will be written, printed, or outlined for everything. You can understand everything you want by a guide. Book has a different type. As we know that book is important thing to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A publication Mathematical Modeling: Applications with GeoGebra will make you to possibly be smarter. You can feel a lot more confidence if you can know about everything. But some of you think that will open or reading any book make you bored. It isn't make you fun. Why they might be thought like that? Have you seeking best book or suited book with you?

Ashley Washington:

This Mathematical Modeling: Applications with GeoGebra usually are reliable for you who want to certainly be a successful person, why. The reason of this Mathematical Modeling: Applications with GeoGebra can be among the great books you must have will be giving you more than just simple examining food but feed anyone with information that possibly will shock your before knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions in e-book and printed versions. Beside that this Mathematical Modeling: Applications with GeoGebra giving you an enormous of experience including rich vocabulary, giving you demo of critical thinking that we know it useful in your day activity. So , let's have it and revel in reading.

Susan Demar:

Reading a publication can be one of a lot of pastime that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people like it. First reading a reserve will give you a lot of new data. When you read a publication you will get new information due to the fact book is one of various ways to share the information or their idea. Second, studying a book will make anyone more imaginative. When you reading a book especially tale fantasy book the author will bring that you imagine the story how the people do it anything. Third, you are able to share your knowledge to some others. When you read this Mathematical Modeling: Applications with GeoGebra, you are able to tells your family, friends as well as soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a guide.

Mary Tobin:

You can spend your free time to study this book this publication. This Mathematical Modeling: Applications with GeoGebra is simple to bring you can read it in the playground, in the beach, train in addition to soon. If you did not have much space to bring typically the printed book, you can buy the particular e-book. It is make you simpler to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.
