Telematic Embrace: Visionary Theories of Art, Technology, and Consciousness by Roy Ascott Roy Ascott

Long before e-mail and the Internet permeated society, Roy Ascott, a pioneering British artist and theorist, coined the term "telematic art" to describe the use of online computer networks as an artistic medium. In *Telematic Embrace* Edward A. Shanken gathers, for the first time, an impressive compilation of more than three decades of Ascott's philosophies on aesthetics, interactivity, and the sense of self and community in the telematic world of cyberspace. This book explores Ascott's ideas on how networked communication has shaped behavior and consciousness within and beyond the realm of what is conventionally defined as art.

Telematics, a powerful marriage of computers and telecommunication, made technologies we now take for granted—such as e-mail and automated teller machines (ATMs)—part of our daily life, and made art a more interactive form of expression. Telematic art challenges traditional relationships between artist, artwork, and audience by allowing nonlocal audiences to influence the emergent qualities of the artwork, which consists of the ebb and flow of electronic information. These essays constitute a unique archaeology of ideas, tracing Ascott's meditations on the formation of consciousness through the intertwined cultural histories of art and technology from the 1960s to the present.

Shanken's introduction situates Ascott's work within a history of ideas in art, technology, and philosophy. Given the increasing role of the Internet and the World Wide Web in the creation of commerce and community at the dawn of this new millennium, scholars, students, laypeople, policymakers, and artists will find this collection informative and thought-provoking.

So , do you still thinking Telematic Embrace: Visionary Theories of Art, Technology, and Consciousness by Roy Ascott is not loveable to be your top record reading book?

Gloria Lentz:

Are you kind of stressful person, only have 10 or perhaps 15 minute in your time to upgrading your mind expertise or thinking skill actually analytical thinking? Then you are receiving problem with the book than can satisfy your limited time to read it because this all time you only find book that need more time to be go through. Telematic Embrace: Visionary Theories of Art, Technology, and Consciousness by Roy Ascott can be your answer because it can be read by an individual who have those short time problems.

Corey Cook:

As a college student exactly feel bored in order to reading. If their teacher expected them to go to the library in order to make summary for some guide, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that looking at is not important, boring and also can't see colorful pictures on there. Yeah, it is for being complicated. Book is very

important to suit your needs. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Telematic Embrace: Visionary Theories of Art, Technology, and Consciousness by Roy Ascott can make you sense more interested to read.
