Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics)

Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics)

Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics)

Enormous advances in information technology have permeated essentially all facets of life in the past two decades. Formidable challenges remain in fostering tools that enhance productivity but are sensitive to work practices. Cognitive Informatics (CI) is the multidisciplinary study of cognition, information and computational sciences that investigates all facets of human computing including design and computer-mediated intelligent action, thus is strongly grounded in methods and theories from cognitive science. As an applied discipline, it has a close affiliation with human factors and human-computer interaction, and provides a framework for the analysis and modeling of complex human performance in technology-mediated settings and contributes to the design and development of better information systems. In recent years, CI has emerged as a distinct area with special relevance to biomedicine and health care. In addition, it has become a foundation for education and training of health informaticians, the Office of the National Coordinator for Health Information Technology initiating a program including CI as one of its critical elements to support health IT curriculum development. This book represents a first textbook on cognitive informatics and will focus on key examples drawn from the application of methods and theories from CI to challenges pertaining to the practice of critical-care medicine (CCM). Technology is transforming critical care workflows and re-organizing patient care management processes. CCM has proven to be a fertile test bed for theories and methods of cognitive informatics. CI, in turn, has contributed much to our understanding of the factors that result in complexity and patient errors. The topic is strongly interdisciplinary and will be important for individuals from a range of academic and professional backgrounds, including critical care specialists, psychologists, computer scientists, medical informaticians, and anthropologists.??

From reader reviews:

Shad Broussard:

Information is provisions for those to get better life, information nowadays can get by anyone on everywhere. The information can be a understanding or any news even restricted. What people must be consider when those information which is from the former life are challenging to be find than now could be taking seriously which one would work to believe or which one the actual resource are convinced. If you have the unstable resource then you understand it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) as your daily resource information.

Kristen Wright:

Hey guys, do you wishes to finds a new book to study? May be the book with the concept Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) suitable to you? Often the book was written by popular writer in this era. The actual book untitled Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics)is the main of several books that will everyone read now. This kind of book was inspired lots of people in the world. When you read this reserve you will enter the new dimensions that you ever know ahead of. The author explained their strategy in the simple way, thus all of people can easily to comprehend the core of this book. This book will give you a lots of information about this world now. So that you can see the represented of the world with this book.

Valarie Chamberlin:

A lot of people always spent their particular free time to vacation or go to the outside with them family members or their friend. Do you know? Many a lot of people spent they free time just watching TV, or playing video games all day long. If you wish to try to find a new activity this is look different you can read a new book. It is really fun for you. If you enjoy the book that you read you can spent all day every day to reading a guide. The book Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) it is extremely good to read. There are a lot of folks that recommended this book. These were enjoying reading this book. Should you did not have enough space bringing this book you can buy the particular e-book. You can m0ore easily to read this book from the smart phone. The price is not to cover but this book features high quality.

Mildred Brummett:

Book is one of source of understanding. We can add our understanding from it. Not only for students but additionally native or citizen have to have book to know the up-date information of year to help year. As we know those ebooks have many advantages. Beside many of us add our knowledge, also can bring us to

around the world. From the book Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics) we can get more advantage. Don't one to be creative people? To get creative person must like to read a book. Simply choose the best book that suited with your aim. Don't possibly be doubt to change your life at this book Cognitive Informatics in Health and Biomedicine: Case Studies on Critical Care, Complexity and Errors (Health Informatics). You can more attractive than now.
