**World Without Cancer: The Story of Vitamin B 17** G. Edward Griffin

[Read by Mark Bramhall]

This is the revised and updated edition of G. Edward Griffin's complete and authoritative treatise on the story of vitamin B17. G. Edward Griffin marshals the evidence that cancer is a deficiency disease, like scurvy or pellagra, that is aggravated by the lack of an essential food compound in modern man's diet. That substance is vitamin B17. In its purified form developed for cancer therapy, it is known as laetrile. This story is not approved by orthodox medicine. The FDA, the AMA, and the American Cancer Society have labeled it fraud and quackery. Yet the evidence is clear that here, at last, is the final answer to the cancer riddle. Why has orthodox medicine waged war against this non-drug approach? The author contends that the answer is to be found not in science but in politics -- and is based upon the hidden economic and power agenda of those who dominate the medical establishment. This, Griffin's revised and updated edition, is the most complete and authoritative treatise available on this topic.
