Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) Laura Fernández Gallardo

This work addresses the evaluation of the human and the automatic speaker recognition performances under different channel distortions caused by bandwidth limitation, codecs, and electro-acoustic user interfaces, among other impairments. Its main contribution is the demonstration of the benefits of communication channels of extended bandwidth, together with an insight into how speaker-specific characteristics of speech are preserved through different transmissions. It provides sufficient motivation for considering speaker recognition as a criterion for the migration from narrowband to enhanced bandwidths, such as wideband and super-wideband.

From reader reviews:

Nicole Rockwood:

Book is to be different per grade. Book for children right up until adult are different content. We all know that that book is very important normally. The book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) seemed to be making you to know about other information and of course you can take more information. It is very advantages for you. The reserve Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) is not only giving you far more new information but also to be your friend when you truly feel bored. You can spend your spend time to read your publication. Try to make relationship using the book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services). You never truly feel lose out for everything should you read some books.

Geraldine Matson:

This book untitled Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) to be one of several books that will best seller in this year, this is because when you read this e-book you can get a lot of benefit onto it. You will easily to buy this book in the book shop or you can order it by means of online. The publisher with this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Smartphone. So there is no reason to you to past this reserve from your list.

Debra Lovern:

As a university student exactly feel bored to help reading. If their teacher requested them to go to the library or make summary for some guide, they are complained. Just small students that has reading's heart and soul or real their interest. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading really. Any students feel that studying is not important, boring in addition to can't see colorful photos on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) can make you experience more interested to read.

Michele Sexton:

Reading a book make you to get more knowledge from that. You can take knowledge and information from a book. Book is published or printed or descriptive from each source that filled update of news. In this particular modern era like now, many ways to get information are available for anyone. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can

add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just seeking the Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) when you required it?
